Dated 9.08.2016

## ORDER

**Sub:- Considering the request of consumers for allowing extension of 24 Hrs. supply feeder beyond the prescribed limit of 1 KM in rural areas.**

For applicants requiring urban supply the procedure as prescribed vide order No. JPR5-432 dt. 01.11.2007 is applicable which stipulates that release of new connections is made for small industrial & non domestic connections by extending urban area feeder, the line cost as well as the cost of 11/0.4 KV transformer is not adjustable in energy bills. In such cases metering is done on 11 KV side & in exceptional cases metering on LT supply may be allowed with the approval of Hon'ble MD/ CMD. In such cases 3% transformation losses shall be added to recorded consumption.

Further similar provisions were made for release of other categories of connections such as MIP LT/HT & Mixed load LT/HT vide order No. JPR5-557 dt.10.07.2009.

The matter discussed in Commercial review meeting held on dated 19.07.2016 and looking to the delay in release of connection for want of approval of Hon'ble MD / CMD for allowing LT metering in such cases, it has been decided that for such connection, metering on LT side with addition of 3% transformation losses to the recorded consumption may be allowed by concerned Circle Superintending Engineers on individual merits of the case.

By Order,

(K.K.Purohit)

Superintending Engineer (Comm.)
